

PENSION TECH

SUMMIT

May 16th – 17th
The Hague

After the success of last year and the increased attention towards PensionTech, Holland FinTech continues the project in 2018. On May 16th & 17th 2018 we will gather all the key stakeholders and interested parties to join the second edition of our PensionTech Summit in The Hague.

During the summit, you will be taken on a journey fast forward on how new enabling technologies will affect future societies. How will technology impact how we live, work and how we provide the means to fund rising life expectancy whilst living healthy and happy lives?

The summit will provide an overview of how different developed countries seek collaboration between young innovative companies and incumbent pension industry stakeholders to explore answers to these questions. The program will provide guidance to pension fund executives on why and how they could incorporate new technologies in their funds policy design, execution and control to enhance their decision-making process on potential technology investments.

As a roundup of the day, five exciting new international PensionTech start-ups will showcase the latest technological solutions and pension industry co-creation projects addressing sustainable investing, pension communication, cost reduction & efficiency and business model sustainability.

The 2nd Annual PensionTech Summit provides a unique opportunity to meet other attendees of different background, engage with various experts, and create meaningful connections. Join us for this exclusive event, expand your knowledge and business opportunities!

You and your company have a chance to be part of the event by showcasing your startup to over 300 industry professionals, with a help of a stand. On the next page you will find the benefits of the startup stand package.

PENSION TECH
